

On 12/17/22 during a three-way text session between my attorneys Arthur Phillips, cyber crime witness Dr. Cassandra Harrell, and I, three text actions appeared on my iPhone showing to have come from Attorney Phillips iPhone. I sent a text message to both Attorney Phillips and Dr. Harrell stating (quote) "If you both would be so kind, please confirm you received my text. Thank you". Shortly thereafter a series of texts appeared on my phone showing from Attorney Phillips that questioned, disliked, removed a laugh, and then removed the dislike from my joint text. Attorney Phillips did not send the actions from his phone to mine, and sent me a text confirmation validating he did not.

It was impossible for me to enter the various text notices appearing from Attorney Phillips iPhone into mine. Attorney Phillips verified he did not enter the notices. Since I could not complete the entries into my iPhone and Attorney Phillips did not send them, the only remaining answer is that my iPhone is compromised and was operated by a malicious third party.
