

On 5/25/24 while uploading evidence files to my X page, an unsecured Internet address appeared in one of the images I posted. Wanting to hide my cyber crime evidence online, cyber criminals have used unsecured links to conduct attacks against my home office network.

I refreshed the X page and found my uploads had disappeared. The cyber attack made through the unsecured link was successful. My posts were intercepted and blocked to prevent viewing and investigation.

Cyber criminals block my X username (@phillip_aeros) from online searches attempting to keep my presence hidden. Searches for my username will verify their malicious action. The attackers have also blocked my username in TruthSocial (Ricard0_Finney136). Both accounts appear in my desktop.

For you Following Sharyl Attkisson 4 OPEN INFO Tucker carlsor
