

Attempting to keep me silenced, cyber criminals block my direct access to X during the login process. My initial connection to X quickly logs off X and back on to a malicious link they control. Nothing I post is seen. I never receive responses to contacts made on X.

Video and screen shots from my desktop reveal cyber attacks log me out of X and redirect my connection to ???. The web address I originally connected to is not the same one I logged out from. Video and screen shots prove this happens:

Video: 30 seconds
