

### Question To Ask The FBI

- Since 2016 Mr. Finney has submitted over 30 FBI IC3 cyber crime complaints and letters to the Chief Operating Office at the FBI Hawaii field office and the Department of Justice seeking law enforcement intervention to stop sophisticated, daily cyber attacks. Evidence provided includes forensic, audio, video, and written evidence along with testimonies from witnesses who validated Mr. Finney's cyber crime claims. Among numerous interviews, Mr. Finney was seen by agents in California and Hawaii and most recently sent emails asking for intervention to a Hawaii-based FBI agent who continues to ignore him. In seven years not one reply has been sent or a phone call returned by anyone at the FBI at any level.
- The FBI has been, and continues to allow the cyber attacks made against Mr. Finney to continue uninterrupted ignoring the forensic, audio, video, and written documentation he has presented along with written testimony from computer engineers validating his devices have been compromised again and again.

\*\*\*\*\*

FBI Reasoning: The FBI's lack of action in coordination with HPD has a purpose. Investigating cyber crimes committed against me ultimately uncovers facts surrounding the whistle blowing. All those who are complicit are counting on the hackers to attack successfully and take me offline permanently, or continue attacking until I can no longer afford the high costs for specialized online security and my connectivity is blocked.

**Question:** With the mountain of cyber crime evidence presented over such a long period delivered to you by Mr. Finney, why have the cyber attacks against him and his family been allowed to continue without investigations being conducted?
