

On 5/18/24 I found my password for the secure website operated by radio show host Dennis Prager was compromised. When I attempted to reset my password, cyber criminals disabled the secure connection to the password reset page causing entry to be a security risk.

To ensure privacy, sites to change passwords are not http/unsecured. They are always secured.

This criminal act was done to prevent me from communicating with Mr. Prager and informing him of his identity theft.

PASSWORD CHANGE SITE HACKED

HTTPS-Only Mode Alert

Secure Site Not Available

You've enabled HTTPS-Only Mode for enhanced security, and a HTTPS version of url8181.pragertopia.com is not available.

[Learn More...](#)

What could be causing this?

- Most likely, the website simply does not support HTTPS.
- It's also possible that an attacker is involved. If you decide to visit the website, you should not enter any sensitive information like passwords, emails, or credit card details.

If you continue, HTTPS-Only Mode will be turned off temporarily for this site.
