

I receive 24/7/365 cyber attacks against devices connected to my wired and wireless networks. I was forced to remove the Wi-Fi receiver in my LaserJet printer to prevent it from being illegally accessed and permanently disabled as my other printers have.

This extreme measure is one of many adjustments and modifications I've been forced to make in response to the cabal's attacks attempting to silence me and keep their crimes against me and others unknown and hidden.

Wi-Fi receiver and cable
